EDUCATION

Stevens Institute of Technology

Hoboken, NJ

Master of Science in Finance

May 2027 (Expected)

Bachelor of Science in Computer Science, Minor in Quantitative Finance

Sep. 2022 – May 2026

- **Awards:** Edwin A Stevens Scholarship, Dr. Charles Suffel Scholarship, Rising Star in IT 2025, Dean's List
- **Relevant Coursework:** Machine Learning, Data Structures, Algorithms, Computer Architecture, Systems Programming, Software Development Systems, Agile Methodologies, Database Management, Web Programming

EXPERIENCE

Artificial Intelligence Researcher

May 2025 – May 2026

Stevens Institute of Technology - Professor Yan

Hoboken, NJ

- Analyzing conversational data from AI-assisted team experiments to study effects on creativity and decision-making
- Processed and coded experimental data in Python and Excel to identify patterns in group dynamics and AI influence
- Co-designed and evaluated AI-human interaction experiments, improving analysis efficiency by 50%

Information Technology Assistant

Jan 2025 – Feb 2026

Stevens Institute of Technology

Hoboken, NJ

- Developed technical solutions to enhance user experiences, leveraging knowledge of IT systems, conferencing platforms, networking, and software tools
- Managed cross-campus tech operations, streamlining workflows and reducing request resolution time by 20%

AI Software Engineering Intern

August 2025 – September 2025

Sentari AI

Remote

- Engineered full-stack AI journaling platform (Flask, Supabase, Docker) with 15+ RESTful APIs for voice transcription, multi-language detection (170+), AI tag generation, sentiment analysis, and automated emoji suggestions
- Integrated GPT-4 and Whisper APIs for dynamic, language-aware responses in 10+ major languages, optimizing model selection based on real-time detection
- Designed and modified SQL database schemas in Supabase to support new product features, including an AI assistant name-change system, ensuring seamless integration with backend APIs and scalable data storage.
- Developed mood mapping and emotional trend analysis features correlating user-reported and AI-inferred energy levels with sentiment scores, enabling personalized insights and adaptive recommendations

PROJECTS

CenterPlate | *React Native, Expo, Node.js, Express, MongoDB, Socket.IO, Firebase*

Sep 2025 – May 2026

- Built a full-stack cross-platform mobile app for group meetup coordination and real-time restaurant voting
- Engineered a custom smart midpoint algorithm scoring geospatial grid candidates via a weighted fairness function (85% min-max travel distance, 15% log-weighted city hub proximity)
- Integrated Foursquare Places API v3 with multi-tier fallback logic and real-time session sync via Socket.IO rooms, with Firebase JWT authentication on both REST and WebSocket connections

Stock Market Prediction Model | *Python, Keras, TensorFlow, Pandas*

June 2025 – August 2025

- Designed and trained an LSTM neural network on 8 years of stock data from Yahoo Finance to forecast price trends
- Implemented data preprocessing, normalization, and time-series windowing to improve model performance
- Achieved an RMSE of 2.451 and evaluated model accuracy using visualization techniques with Matplotlib

LEADERSHIP & EXTRACURRICULARS

Alpha Sigma Phi

Hoboken, NJ

Vice President of Finance

May 2025 – May 2026

- Managing chapter budgeting and financial operations using Excel, BillHighway, structured planning, and forecasting

The Link (Yearbook)

Hoboken, NJ

President / Co-Editor

Sep 2022 – May 2025

- Lead cross-functional team of 20+ in agile-inspired workflow to design, develop, and publish 400+ page yearbook

TECHNICAL SKILLS

Languages: Python, JavaScript, Typescript, Java, SQL, C/C++, HTML/CSS, R

AI/ML: LLM Integration (Claude Code, GPT 5), Prompt Engineering, NLP Pipelines, Sentiment Analysis, AI Feature Development, Backend API Integration, Model Evaluation, Time Series Forecasting, TensorFlow, Keras, scikit-learn

Frameworks: Flask, React, React Native, Node.js

Data Science: Excel, pandas, NumPy, Matplotlib, Statistical & Market Analysis

Cloud & Tools: Git, VS Code, Supabase, MongoDB, Expo Go, Cursor, Github Copilot, Docker, Android Studio
